

ABIN GOMEZ

Full Stack Developer · Web & Game Development · React · Node.js · MongoDB

+91 70252 96999 | gomezdevelops@gmail.com | linkedin.com/in/abingomez | github.com/gomezdevelops |
Kollam, Kerala, India

PROFESSIONAL SUMMARY

Results-driven BCA graduate with 2+ years of hands-on full-stack development experience, delivering scalable web applications from concept to deployment. Proficient in the JavaScript ecosystem (React.js, Node.js, Express.js, MongoDB) with supplementary skills in Java, Python, and game development using Unity. Demonstrated ability to independently architect, build, and ship production-grade applications including authentication systems, REST APIs, and cloud-deployed services. Eager to contribute technical depth and a self-starter attitude to a collaborative engineering team.

TECHNICAL SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, DOM Manipulation

Backend: Node.js, Express.js, REST APIs, Authentication Systems, CRUD Operations, API Integration

Languages: JavaScript, TypeScript, Java, Python, C, C#, SQL

Databases: MongoDB, MySQL, PostgreSQL

Game Dev: Unity (C#), 2D/3D Mechanics, Physics Systems, Scene Management

DevOps & Tools: Git, GitHub, Postman, Docker (Basics), Vercel, Railway, VS Code

CS Fundamentals: Data Structures & Algorithms, DBMS, OS, Computer Networks, OOP, Software Engineering

AI & Productivity: AI-assisted Development, Prompt Engineering, Debugging Workflows

EXPERIENCE

Full Stack Web Development Intern | Edu-versity

Remote / India

2024 · 3 Months

- Contributed to building responsive full-stack web applications using React.js, Node.js, Express.js, and MongoDB throughout the full development lifecycle.
- Implemented authentication systems, REST API integrations, and database connectivity that improved application security and performance.
- Collaborated on debugging, testing, and performance optimization, reducing identified bottlenecks across key application flows.
- Gained practical exposure to production development workflows, deployment pipelines, and team-based code review processes.

Full Stack Developer (Independent Projects) | Self-Directed

2024 – Present

- Designed, developed, and deployed multiple full-stack applications and responsive websites end-to-end using modern JavaScript frameworks.
- Built and maintained scalable backend architectures with Node.js and Express.js, integrating MongoDB for persistent data management.
- Implemented secure authentication workflows (JWT, session management) and RESTful APIs consumed by React.js frontends.
- Managed source control using Git/GitHub; maintained clean commit history and documentation for all personal repositories.
- Deployed applications via Vercel and Railway, gaining real-world experience with cloud hosting and CI/CD workflows.

KEY PROJECTS

Smart Attendance System Using Face Recognition *(Final Year Major Project)*

Python · Flask · SQLite · OpenCV · dlib · NumPy · Pandas · HTML/CSS

- Designed and built a full-stack web application that automates student attendance using real-time face recognition, eliminating manual roll-calls and proxy attendance in educational institutions.
- Implemented 128-dimensional facial encoding generation via dlib, achieving accurate real-time student identification via webcam during live attendance sessions.
- Architected a modular Flask backend with 15+ routes covering admin authentication, student registration, subject management, attendance processing, report generation, and email notifications.
- Integrated automated Gmail SMTP email alerts for students below 75% attendance threshold and built Pandas-powered Excel export for attendance data reporting.
- Designed a normalized SQLite schema (6 tables: admins, students, subjects, face_encodings, attendance, email_logs) with duplicate-entry prevention and secure password hashing via Werkzeug.

Discord Automation Bot — *Node.js · Discord.js · MongoDB*

- Built a multifunctional Discord bot featuring moderation tools, ticket systems, leveling mechanics, and server automation utilities used by active communities.
- Engineered slash command handling, role management, and logging systems backed by MongoDB for persistent user data storage.
- Optimized command architecture for scalability and deployed to a cloud hosting platform for 24/7 uptime.

Full Stack Web Applications — *React.js · Node.js · Express.js · MongoDB*

- Developed CRUD-based web applications with end-to-end user authentication (register, login, session management) and protected API routes.
- Designed responsive frontend interfaces in React.js with reusable component architecture and optimized rendering performance.
- Architected RESTful backend services in Express.js with structured error handling, validation middleware, and database integration.

Responsive Portfolio Website — *React.js · Tailwind CSS*

- Designed and developed a mobile-first portfolio site showcasing projects, skills, and contact information with strong accessibility standards.
- Leveraged Tailwind CSS utility classes for rapid, consistent UI development and smooth cross-device responsiveness.

EDUCATION

Bachelor of Computer Applications (BCA)

Amrita School of Computing — Amrita Vishwa Vidyapeetham, Amritapuri • CGPA: 7.69 • Graduation: June 2026

Higher Secondary Education (11th–12th Grade)

Sree Narayana Public School, Kollam

Secondary Education (10th Grade)

Trinity Lyceum, Kollam • 94.6%

CERTIFICATIONS

- Learn React — Scrimba
- Advanced JavaScript — Scrimba
- Full Stack Web Development — Edu-versity

LANGUAGES

English & Malayalam (Native / Bilingual) · **Hindi & Urdu** (Professional Working) · **Malay** (Limited Working)
